

# POWER WASHING OHIO'S CONCRETE & EXPOSED AGGREGATE RECOMMENDED SEALERS

When left unsealed, concrete and exposed aggregate installations can become vulnerable to staining and degradation from the wear and tear of weather and everyday use. Trident sealers offer protection from these offenders and much more. Therefore, surfaces sealed with Trident will be easier to maintain and offer long-lasting durability. Although all Trident sealers can be used on concrete and exposed aggregate, the following sealers are our top recommendations. **Select the sealer below that best matches the protection needed for your surface.**

Ultimate Water Repelling & Salt Protection (Better)	Advanced Water Repelling & Salt Protection (Good)	Ultimate Stain Blocking (Best)
<a href="#"><u>Sea Wall</u></a>	<a href="#"><u>Break Wall</u></a>	<a href="#"><u>Barrier</u></a>

Advanced Stain Resistance (No Salt Protection)	
Moderate enhancement	Natural Look
<a href="#"><u>Typhoon</u></a>	<a href="#"><u>Cyclone</u></a>
